

Afriditta

A new generation of butternut

The plant of **Afriditta** has a strong growth habit with good Powdery Mildew tolerance. The average fruit weight is 800 - 1200 grams and may be slightly larger in main season productions. This make it ideal for retail, pre-pack and export. The fruits are uniform in shape with a deep orange flesh colour at maturity.

Afriditta maintains a good size in spring/early plantings.

- Large fruit, 800 - 1200 grams
- Early into production
- High fruit set
- Waltham fruit shape, highly uniform
- Good, uniform internal colour
