

# Maxeza

## Variety characteristics

- **Resistances:** HR: ToMV:0-2/Ff:A-E/Fol:0,1/For IR: On | T: Si
- **Plant length:** Tall (especially first 3 months).
- **Vigour:** Quite vigorous (necessary generative cultivation).
- **Plant habit:** Half open.
- **Fruit shape:** Flat round shape .
- **Fruit size:** 150-170 (pruned on 5 fruits).
- **Firmness:** Very good.
- **Colour:** Uniform red colour.
- **Greenparts:** Thick greenparts (jointless).
- **Yield potential:** High early production and good total production.
- **Shelf life:** Excellent.
- **Others:**
  - Uniform trusses with a large fruit size.
  - Strong against cracking.
  - Early setting in periods with very warm weather.
  - Labour friendly, because less shoots and easier to twist around the string than standard varieties.

Descriptions, recommendations and illustrations in brochures and leaflets shall correspond as closely as possible to tests and practical experience and are subject to typographical and/or printing errors. This information shall be provided to assist professional growers and users, whereby variable local conditions must be taken into account. Under no circumstances shall Enza Zaden accept liability based on such information for deviating results in the cultivated product. Current information concerning the resistances is available on [www.enzazaden.com](http://www.enzazaden.com).
