

# Afrizeus

## A new generation of butternut

**Afrizeus** has a strong growth habit with good Powdery Mildew tolerance and is significantly earlier into production leading market standards. The average fruit weight may be slightly larger in main season productions. This make it ideal for retail, pre-pack and export. The fruits are uniform in shape with a deep orange flesh colour at maturity. **Afrizeus** maintains a good size in spring/early plantings.

- Large fruit, 800 - 1200 grams
- High yielding
- Waltham fruit shape, highly uniform
- Good, uniform internal colour
