## Dill at Enza Zaden

Enza Zaden is active in the breeding of dill varieties. We aim to optimize the dill for our growers depending on the purpose. The pot dills have a short hypocotyl to present themselves stable and in the pot and are easy to pack. For open field and and the fresh market, we focus on bolting resistance and short stems with many feathered tips to present full bundles full of fresh tips with an appealing color and long shelf life.

### Teddy |

Our new variety with many tips and a short hypocotyl. It comes with a fresh bright green color and is ideal for bundles and pot production.

### Ida |

Standard dill.

### Ella |

Dark blue-green plants with a lot of leaf tips. Due to the extra short hypocotyl, this dill variety provides compact and very stable plants for pot production. It is also suited to harvest fresh bundles.

### Green Sleeves |

A very stable, dark green dill of the leafy type for the production of fresh bundles. Green Sleeves is strong against bolting and thence suited to all year-round growing.

### Tetradill sel. Goldkrone |

Enza Zaden’s selection in the tetraploid type with, especially, high yielding. A slow bolting habit of a longer cutting time and therefore also well suitable for extensive growth. Selected for a fresh cut and industry purposes.

Product description	
Annual, height 100 cm	
Sowing:	Direct outdoors in March for cropping in summer, or sow in August for cropping in April in the following year. For forcing chives to sow in February under glass.
Seed amount:	Direct 120-150 g/100 m², for seedlings 20-30 g/1.000 plants (20-30 seeds per press-pot) for pot growing 40 g/1.000 plants.
Cultivation:	For dill seed in rows 30 cm apart, for dill leaf-tips 15-20 cm apart, for bundles 20-30 cm apart, depending on the desired plant size at harvest.

# Various Herbs

Marino

Citrina

Fanni

German Winter

## Chervil

### Massa |

High yielding and very aromatic.

## Coriander

### Marino |

Reliable selection with thickly feathered, fine stalked leaves. Improved bolting tolerance.

## Lemon balm

### Citrina |

Improved standard selection, with intense flavour.

## Lovage

### Elsbetha |

Reliable growth, for soups.

## Sage

### Fanni |

Perennial, good flavour.

## Sorrel

### Belleville |

Standard type, good yield in hydroponic production.

## Thyme

### German Winter |

Enza Zaden selection.

## Watercress

### Avona |

Standard type, good yield in hydroponic production.
